

KAICO SHINE SOAP

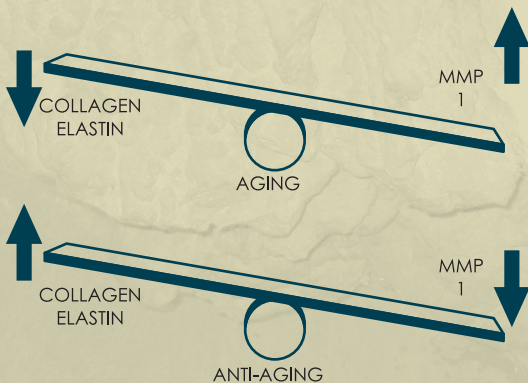

KAICO · SHINE TECHNOLOGIES

with bird's nest extract

肽极燕窝萃取技术

经我们的核心技术把燕窝里最小分子糖肽(KaicoShine)萃取出来。KaicoShine容易被皮肤表面吸收到,可增加人体皮肤纤维细胞增长,增加其胶原蛋白和弹性蛋白的产生,减少破坏性酶MMP1的活性,保持皮肤的青春和防止衰老。

KaicoShine is small glycopeptides extracted from bird's nest with our core technology. It is easy to be absorbed by skin, promotes skin cells proliferation, increases collagen and elastin synthesis, reduces MMP1 enzyme activity, maintain the youthfulness of skin and anti-aging

燕窝萃取护肤香皂

with bird's nest extract

The light molecular glycoproteins is the active compound in the Kaicoshine soap which is good for skin rejuvenation.

Kaicoshine increases skin cell proliferation and skin matrix production
